

CSA1505 - CLOUD COMPUTING AND BIG DATA ANALYTICS

Experiment-2

Create a simple cloud software application for Appointment System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as search for cabs, from, to, rental , out station, Package type, hours/Days etc.

Input :

Output

The screenshot shows a web browser window with the URL `creatorapp.zoho.in/pinjariabdul050/environment/development/exp1#Report:Todays_Appointments`. The application interface has a dark sidebar on the left with the user's name 'Abdul Pinjari' at the bottom. The main content area is titled 'Todays Appointments' and features a calendar view for 'Friday, July 17, 2026'. The calendar shows a grid of time slots from 6:00 to 16:00 in one-hour increments. The interface includes a top navigation bar with 'EXP1' and 'Development' tabs, and a bottom status bar showing system information like weather and time.

Overview:

The screenshot shows the 'New Appointment' form in the same web application. The URL is `creatorapp.zoho.in/pinjariabdul050/environment/development/exp1#Form:New_Appointment`. The form is titled 'New Appointment' and contains several input fields: 'Name' (split into 'First Name' and 'Last Name'), 'Mobile Number' (with a dropdown for country code, currently showing '+91'), 'Email Id', 'Age' (with a masked input '#####'), 'Address' (split into 'Address Line 1' and 'Address Line 2'), 'City / District', 'State Province' (with a dropdown), 'Postal Code', and 'Country' (with a dropdown). There is also an 'Appointment Date-Time' field with a masked input 'dd-MMM-yyyy HH:mm:ss'. The sidebar and top navigation bar are consistent with the previous screenshot.
