

EXPERIMENT-13

Create a Virtual Machine with 1 CPU, 2GB RAM and 15GB storage disk using a Type 2 Virtualization Software.

AIM:

To create a Virtual Machine with 1 CPU, 2 GB RAM, and 15 GB storage using a Type-2 Hypervisor.

PROCEDURE:

Step 1: Open the Type-2 virtualization software (VirtualBox or VMware Workstation).

Step 2: Click New, enter the virtual machine name, and select the operating system type and version.

Step 3: Allocate 2 GB (2048 MB) RAM to the virtual machine.

Step 4: Create a 15 GB virtual hard disk for the virtual machine.

Step 5: Open Settings and configure the processor to 1 CPU.

Step 6: Attach the operating system ISO file and click Start to boot the virtual machine.

Step 7: Install the operating system and verify that the virtual machine has 1 CPU, 2 GB RAM, and 15 GB storage.

Step1:

Step2:

New Virtual Machine Wizard

✕

Name the Virtual Machine
What name would you like to use for this virtual machine?

Virtual machine name:

Ubuntu (2)

Location:

C:\Users\HP\OneDrive\ドキュメント\Virtual Machines\Ubuntu (2)

Browse...

The default location can be changed at Edit > Preferences.
