

EXP 15: Create a Snapshot of a VM and Test it by loading the Previous Version/Cloned VM

Aim

To create a **Snapshot** of a Virtual Machine and test it by restoring the **previous version** or using a **cloned VM** in VMware Workstation.

Procedure

Step 1: Open **VMware Workstation** and select the virtual machine.

Step 2: Power on the virtual machine and make the required changes (if any).

Step 3: Click **VM** → **Snapshot** → **Take Snapshot**, enter a name, and save the snapshot.

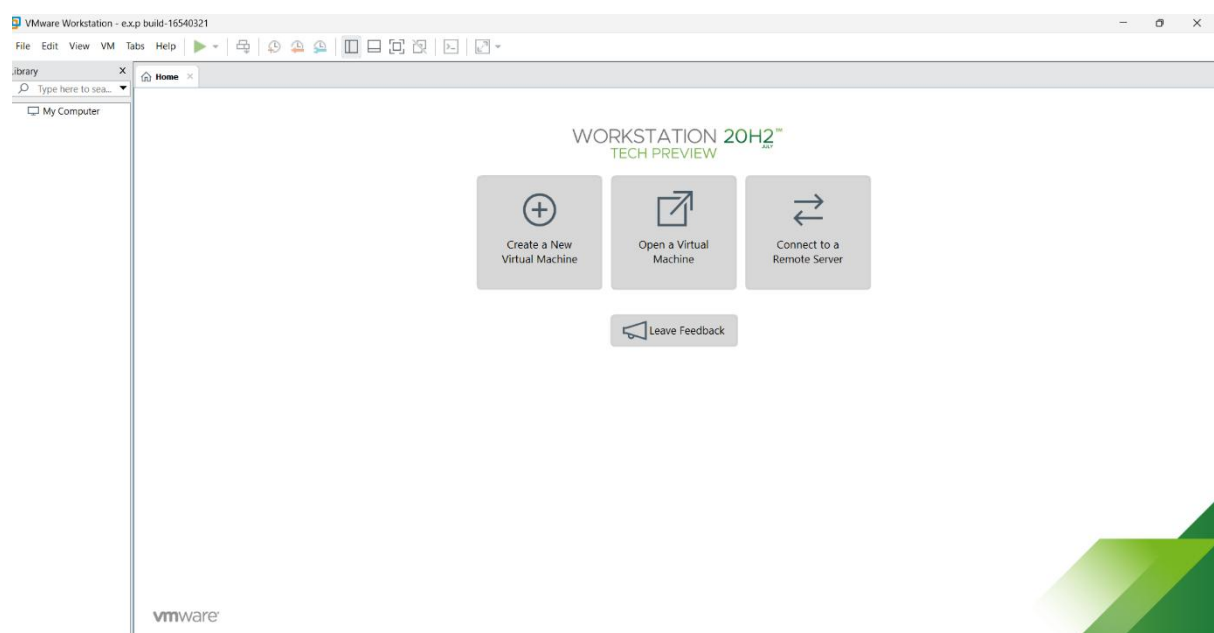

Step 4: Make additional changes to the virtual machine after creating the snapshot.

Step 5: To restore the previous version, click **VM** → **Snapshot** → **Revert to Snapshot**.

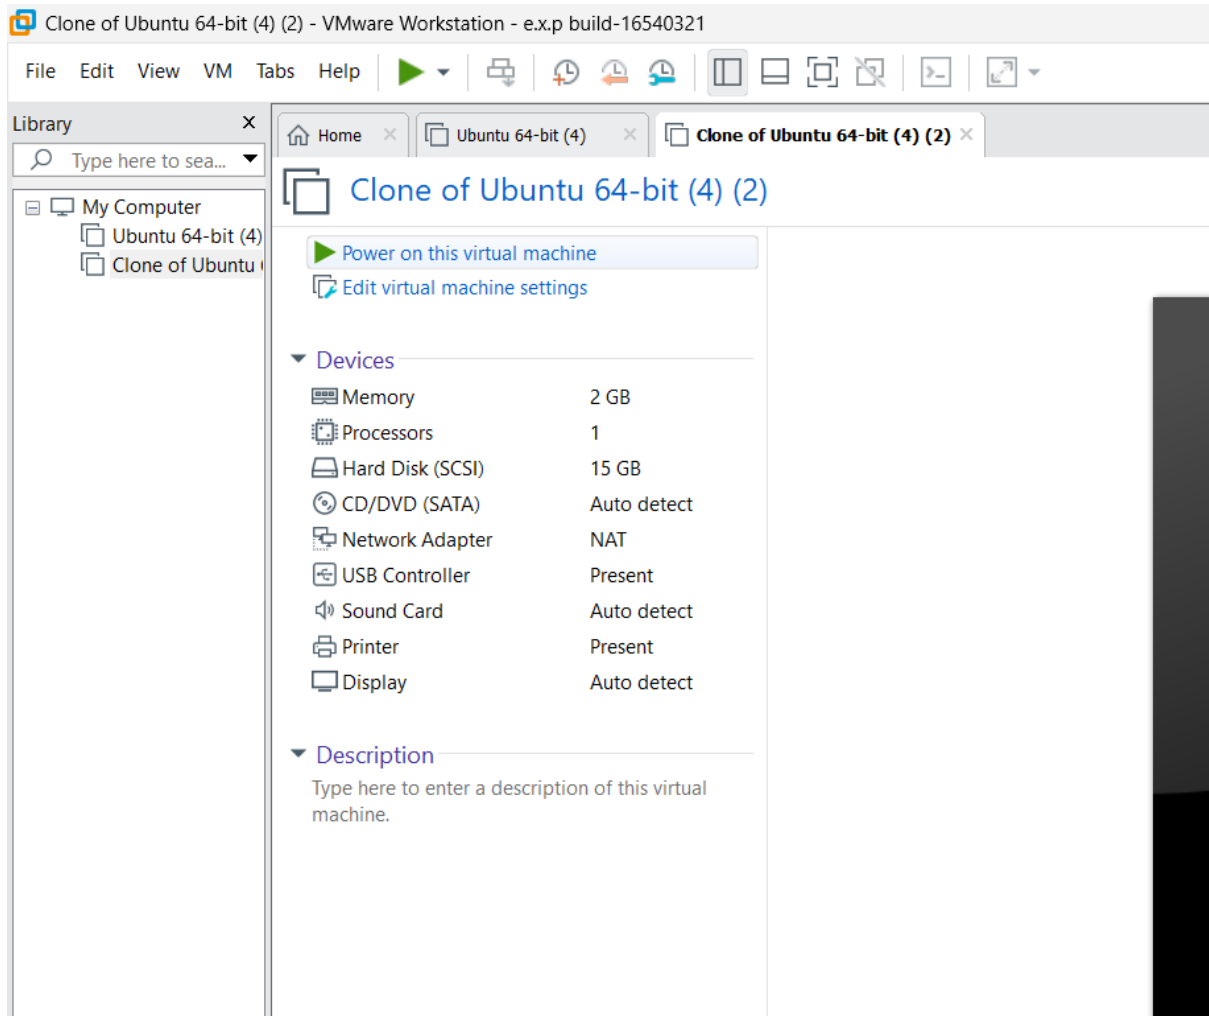

Step 6: Alternatively, create a **Clone** of the virtual machine using **VM** → **Manage** → **Clone** and complete the cloning process.

Step 7: Start the restored or cloned virtual machine and verify that it works correctly.
