

EXP 16: Create a Cloning of a VM and Test it by loading the Previous Version/Cloned VM

Aim

To create a **clone** of a Virtual Machine and test it by loading the **cloned VM** in VMware Workstation.

Procedure

Step 1: Open **VMware Workstation** and select the virtual machine to be cloned.

Step 2: Power off the virtual machine if it is running.

Step 3: Click **VM** → **Manage** → **Clone** to open the Clone Virtual Machine Wizard.

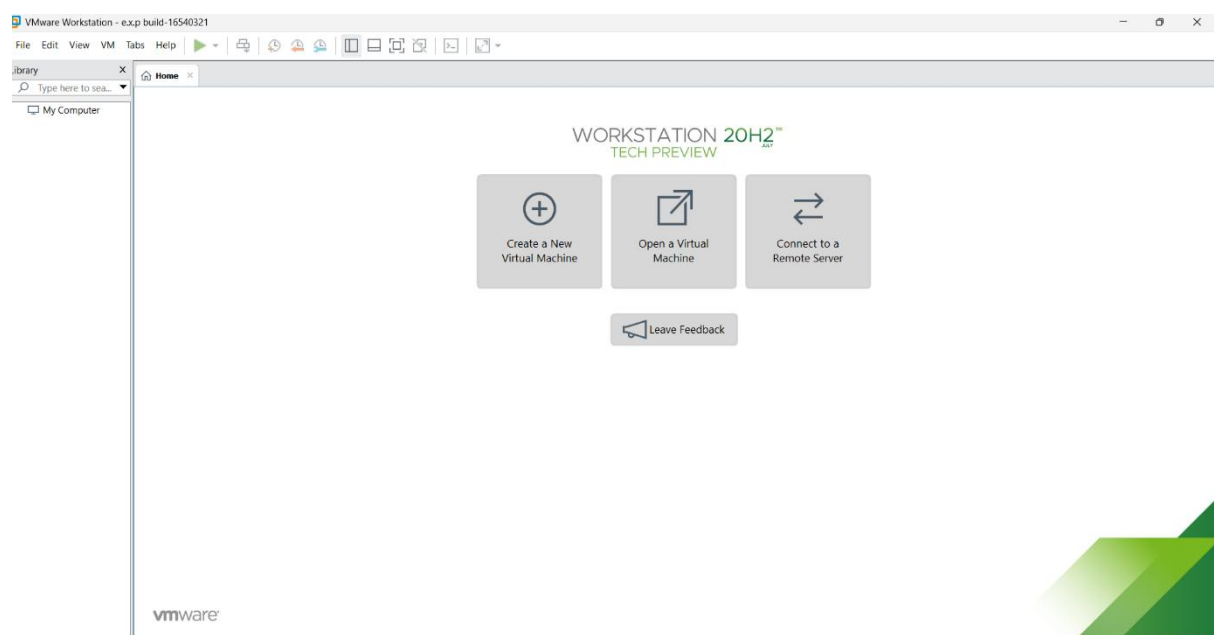

Step 4: Select the clone type (**Full Clone** or **Linked Clone**) and click **Next**.

Step 5: Enter a name and location for the cloned virtual machine, then click **Finish**.

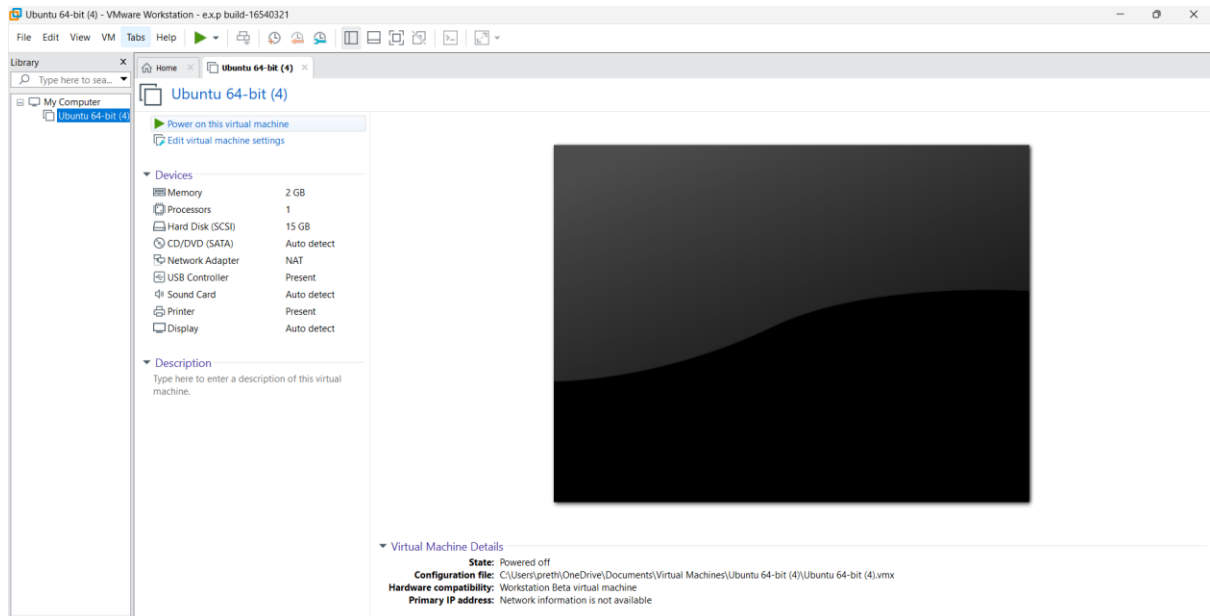

Step 6: Open the newly created cloned virtual machine and click **Power On**.

Step 7: Verify that the cloned virtual machine loads successfully and functions correctly.
