

Experiment: Library Book Reservation System for SIMATS Library

Aim:

To develop a simple Library Book Reservation System for SIMATS Library using Zoho Creator to demonstrate the Software as a Service (SaaS) model, enabling users to reserve and manage library books through a cloud-based application.

Procedure:

1. Log in to Zoho Creator and create a new application named SIMATS Library Book Reservation System.
2. Create a form and add the required fields such as Book Title, Author, Publication, Year, Edition, Number of Copies, Rack Number, Book Status, Student Details, and Reservation Date.
3. Configure field properties and create basic workflows for reserving, issuing, and returning books.
4. Save the form, enter sample book records, and verify the generated reports.
5. Publish the application to demonstrate cloud-based access using the SaaS model.

INPUT:

The screenshot displays the Zoho Creator interface for a 'Library booking' application. The left sidebar contains navigation links: 'Library booking' (selected), 'Library booking Report', and a user profile for 'Abdul Pinjari'. The main area shows the 'Library booking' form with the following fields:

- Student name: First Name, Last Name
- Department: -Select-
- Register number: #####
- Email:
- Phone: +91 81234 56789
- Book name: -Select-
- Author: -Select-
- Rack number: #####
- Reservation date: dd-MMM-yyyy
- Return date: dd-MMM-yyyy
- Comments:

The top bar indicates the application is in 'Development' mode, with options to 'View as -MySelf-', 'Trial has expired', 'Upgrade', 'Edit this application', and 'Help'. The bottom status bar shows the system time as 11:24 AM on 29-07-2026.
